

This is title

1. Text

[Latin](#) refers to an ancient Italic language originating in the region of Latium in ancient Rome.

2. Page Objects

2.1 Table

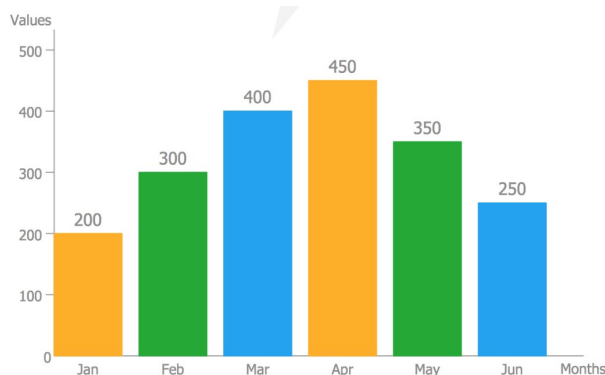

Here's a sample table below, designed to be simple for easy understand and quick reference.

Name	Corp	Remark
Foo		
Bar	Microsoft	Dummy

Table 1: This is a dummy table

2.2. Figure

Here is a figure with some text

3. Others

AI Document Intelligence is an AI service that applies advanced machine learning

to extract text, key-value pairs, tables, and structures from documents automatically and accurately. Turn documents into usable data and shift your focus to acting on information rather than compiling it. Start with prebuilt models or create custom models tailored to your documents both on premises and in the cloud with the AI Document Intelligence [studio](#) or SDK.

The custom extraction capabilities in AI [Document Intelligence](#) help you overcome this challenge by training on your own data based on just five documents. Not only is the first output more reliable and tailored to your needs, but it also allows you to provide human input to create a highly accurate model customized to your forms.

$$\text{MSE} = \frac{1}{n} \sum_{i=1}^n (y_i - \hat{y}_i)^2$$
